

Constant Current LED Power Supply Phasecut Dimmable

Product description:

This type of power supply is an exclusively designed stabilized power supply for LED lamp. With constant current (CC) technology, it is suitable for constant current lamps (350/500/700mA) connected in a series. The output current of the converter could be dimmed between 10%-100% by trailing or leading edge dimmers. The built-in protection circuit will shut down the converter in case of such faults as: open circuit, short circuit, over load, over temperature. The power supply will restart automatically after fault correction.

Standards:

EN61347-1
EN61347-2-13
EN61547
EN55015
EN61000-3-2
EN61000-3-3
EN62384
EN62493

Characteristics:

- Independent dimmable power supply for constant current LED lamp
- Terminal block quick connection
- Class II protection against electric shock from direct and indirect contact
- The output current of the power supply could be dimmed between 10%-100% by trailing edge or leading edge dimmers
- Ripple free constant output current
- High compatible for different dimmers
- Quiet design, working noise is less than 30dB
- Open circuit, short circuit, over load and over temperature protection
- Auto restart after fault conditions removal Low output current ripple design
- Efficiency: 82% (AC230V, full load)
- 5 years warranty

Note	1.Tolerance : includes set up tolerance, line regulation and load regulation. 2.Tested at full load,230Vac.Refer to"Power Factor" and "EFFICIENT"curve graphs. 3.All parameters NOT specially mentioned are measured at nominal voltage input, rated load, 25 of ambient temperature and no dimmer. 4.The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
